PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence and Machine Learning at VIT Bhopal University (CGPA 9.07/10). Built and deployed four full-stack platforms spanning REST APIs, real-time multiplayer backends, RAG pipelines, and automated repository analysis, using Python, Java, FastAPI, and React. Co-authored a research paper accepted for oral presentation at ICAAI 2025. Seeking full-time and internship roles in software engineering, machine learning, and data analytics.

EDUCATION

VIT Bhopal University — B.Tech, Artificial Intelligence & Machine Learning

Sep 2023 – May 2027

CGPA: 9.07 / 10.0

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, TypeScript

Data Structures & Algorithms: 150+ problems solved on LeetCode; active LeetCode and Codeforces contest participant

Backend & Databases: FastAPI, Java Spring Boot, Spring Security, JWT, WebSockets, REST APIs, PostgreSQL, Supabase

Frontend: React, Next.js, TypeScript, Tailwind CSS, Three.js

Machine Learning & AI: Scikit-learn, LightGBM, Random Forest, Linear Regression, Feature Engineering, Model Evaluation (Precision, Recall, F1, ROC-AUC, R^2), Pandas, NumPy, Matplotlib, Seaborn, OpenCV, TensorFlow.js

GenAI & LLM Engineering: LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, Groq LLaMA 3.3 70B API, Google Gemini API, Multi-Agent Systems

Cloud & Tools: AWS (Foundational), Microsoft Azure (DP-900), Git/GitHub, Vercel, Railway, Render

EXPERIENCE

AI with Python Intern — EDXcellence

Jan 2026 – Apr 2026

- Developed a Random Forest classifier (100 estimators) on the Pima Indians Diabetes dataset (768 records, 8 features), achieving 72.08% accuracy, 0.79 precision, and 0.78 recall (negative class) using scikit-learn.
- Built a multiple linear regression model predicting student exam scores from study-habit data, achieving $R^2 = 0.92$ using scikit-learn; identified weekly study hours as the strongest predictor at +3.5 points per additional hour.

PROJECTS

RepoIQ — AI-Powered GitHub Repository Analysis Platform

2026

FastAPI, React, TypeScript, PostgreSQL, Groq LLM API | [repoiq-insight.vercel.app](#)

- Built and deployed a full-stack GitHub repository analysis platform using FastAPI, React, TypeScript, PostgreSQL, and Groq's LLM API, combining a deterministic health-scoring algorithm with AI-generated repository summaries; frontend on Vercel, backend on Render.
- Implemented JWT authentication and GitHub REST API integration for repository import; structured the backend into routers, services, and repositories.

Launchpad — AI Career Preparation Platform

2026

Next.js, FastAPI, Groq LLaMA 3.3 70B, LangChain | [launchpad-smoky-ten.vercel.app](#)

- Built a full-stack GenAI career-preparation platform using Next.js, FastAPI, LangChain, and Groq's LLaMA 3.3 70B API, combining resume ATS scoring, an adaptive mock interview engine, a RAG-based knowledge assistant, and a learning roadmap generator.
- Built a retrieval pipeline over uploaded documents and an ATS-scoring engine benchmarking resumes against job descriptions using LangChain; resolved LangChain breaking API changes and CORS misconfigurations during deployment.

MafiaMind — Real-Time Multiplayer Social Deduction Game

2026

React 19, TanStack Start, Supabase (Postgres, Realtime, Auth), Google Gemini | [mafia-mind.vercel.app](#)

- Building a real-time multiplayer social deduction game using React 19, TanStack Start, and Supabase, where AI agents driven by Google Gemini across 10 personas generate in-character chat and structured suspicion scores (0-100 with reasoning) each round; implemented Supabase Realtime for live state sync and Postgres row-level security with triggers.

RESEARCH EXPERIENCE

Clinical Decision Support Through Machine Learning: Diabetes Onset Prediction

2024 – 2025

Accepted for Oral Presentation, 4th International Conference on Applied AI and Computing (ICAAIC 2025) | [semanticscholar.org](#)

- Co-authored a paper benchmarking LightGBM against deep learning models for diabetes onset prediction using clinical patient data, covering preprocessing, exploratory data analysis, model training, and evaluation across accuracy, precision, recall, F1, and AUC-ROC; one of a small number of third-year VIT Bhopal students selected to present at an international AI conference.

ACHIEVEMENTS

- Selected, Amazon ML School 2026 — Top 3,000 of 134,000+ applicants
- 3rd Place, CodeVerse Hackathon (250+ teams) — won with SafeWalk, an AI-powered fall-detection app
- Cleared Round 1, Polaris Fellowship 2026
- NPTEL: Introduction to Internet of Things, 92% (Top 2% nationwide); Cloud Computing, 85% (Top 5% nationwide)

CERTIFICATIONS

- IBM — Python for Data Science, AI and Development; Generative AI Using IBM Watsonx
- Microsoft — Certified Azure Data Fundamentals (DP-900); University of Michigan (Coursera) — Applied Machine Learning in Python
