Education

Vellore Institute of Technology

Sep 2023 – May 2027

B.Tech, Artificial Intelligence & Machine Learning; CGPA: 9.07 / 10.0

Technical Skills

Languages: Python, Java, SQL

Backend & Databases: FastAPI, REST APIs, PostgreSQL

Frontend: React, Next.js, TypeScript, Tailwind CSS

Machine Learning & GenAI: Scikit-learn, Pandas, NumPy, LangChain, RAG, Prompt Engineering, Groq LLaMA 3.3, Gemini API

Cloud & Tools: AWS, Git/GitHub, Vercel, Render, Railway

Data Structures & Algorithms: 200+ problems solved on LeetCode; active LeetCode and Codeforces contest participant

Experience

EDXcellence

Jan 2026 – Apr 2026

AI with Python Intern

- Applied supervised learning to two structured prediction tasks: a Random Forest classifier (100 estimators, scikit-learn) for diabetes risk classification and a multiple linear regression model for exam-score prediction from study-habit data
- Diagnosed a 0.79 vs 0.61 precision gap between classes in the classifier and traced it to feature importance (glucose, BMI, age); on the regression model, isolated weekly study hours as the strongest predictor of exam performance (+3.5 points/hour, $R^2 = 0.92$)

Projects

RepoIQ – AI-Powered GitHub Repository Analysis Platform

2026

FastAPI, React, TypeScript, PostgreSQL, Groq LLM API | repoiq-insight.vercel.app

- Architected and deployed a full-stack repository intelligence platform with a deterministic health engine scoring 10 weighted repository signals (tests, CI, docs, activity, licensing) into a 0–100 composite score; frontend on Vercel, backend on Render
- Integrated Groq-hosted LLaMA models to generate architecture summaries, auto-generated READMEs, and repo-specific interview questions, and implemented JWT authentication on a layered FastAPI backend (routers, services, repositories)

Launchpad – AI Career Preparation Platform

2026

Next.js, FastAPI, LangChain, ChromaDB, Groq LLaMA 3.3 70B | launchpad-smoky-ten.vercel.app

- Built a full-stack GenAI career-preparation platform combining resume ATS scoring, an adaptive mock interview engine, a RAG-based knowledge assistant, and a learning roadmap generator
- Implemented a RAG pipeline that chunks uploaded documents with LangChain, embeds them via sentence-transformers (all-MiniLM-L6-v2), and retrieves from ChromaDB to ground LLM answers in the user's own materials

MafiaMind – Real-Time Multiplayer Social Deduction Game

2026

React 19, TanStack Start, Supabase (Postgres, Realtime, Auth), Google Gemini | mafia-mind.vercel.app

- Built a real-time multiplayer social deduction game where 10 AI personas powered by Google Gemini generate in-character chat and structured suspicion scores (0–100 with reasoning) each round
- Implemented Supabase Realtime for live state sync and enforced hidden-role secrecy with Postgres row-level security policies and triggers, ensuring role data is never exposed to unauthorized clients

Research Experience

Clinical Decision Support Through Machine Learning: Diabetes Onset Prediction

2024 – 2025

Accepted for Oral Presentation, 4th International Conference on Applied AI and Computing (ICAAIC 2025)

- Co-authored a paper benchmarking LightGBM against deep learning models for diabetes onset prediction on clinical patient data, covering preprocessing, exploratory data analysis, model training, and evaluation across accuracy, precision, recall, F1, and AUC-ROC
- Selected as one of a small number of third-year students to present at an international AI conference

Achievements & Certifications

- Selected, Amazon ML School 2026 – Top 3,000 of 134,000+ applicants
- 3rd Place, CodeVerse Hackathon (250+ teams) – built SafeWalk, an AI-powered fall-detection app
- Cleared Round 1, Polaris Fellowship 2026
- NPTEL: Introduction to Internet of Things (92%, Top 2% nationwide); Cloud Computing (85%, Top 5% nationwide)
- Certifications: IBM Python for Data Science & AI Development; IBM Generative AI Using Watsonx; Microsoft Azure Data Fundamentals (DP-900); Applied Machine Learning in Python (University of Michigan, Coursera)
