Education

Vellore Institute of Technology

Sep 2023 – May 2027

B.Tech, Artificial Intelligence & Machine Learning; CGPA: 9.07 / 10.0

Technical Skills

Languages: Python, Java, SQL

Backend & Databases: FastAPI, Spring Boot, REST APIs, WebSockets, PostgreSQL

Frontend: React, Next.js, TypeScript, Tailwind CSS

Machine Learning & GenAI: Scikit-learn, Pandas, NumPy, LangChain, RAG, Prompt Engineering, Groq LLaMA 3.3, Gemini API

Cloud & Tools: AWS, Azure, Git/GitHub, Vercel, Render, Railway

Data Structures & Algorithms: 200+ problems solved on LeetCode; active LeetCode and Codeforces contest participant

Experience

EDXcellence

Jan 2026 – Apr 2026

AI with Python Intern

- Built a Random Forest classifier (100 estimators) in scikit-learn on the Pima Indians Diabetes dataset (768 records, 8 features), achieving 72.08% accuracy, 0.79 precision, and 0.78 recall on the negative class
- Developed a multiple linear regression model predicting student exam scores from study-habit data, achieving $R^2 = 0.92$ and identifying weekly study hours as the strongest predictor at +3.5 points per additional hour

Projects

RepoIQ – AI-Powered GitHub Repository Analysis Platform

2026

FastAPI, React, TypeScript, PostgreSQL, Groq LLM API | Live Demo

- Built and deployed a full-stack repository analysis platform combining a deterministic health-scoring algorithm with AI-generated repository summaries; frontend on Vercel, backend on Render
- Implemented JWT authentication and GitHub REST API integration for repository import, and structured the backend into routers, services, and repositories

Launchpad – AI Career Preparation Platform

2026

Next.js, FastAPI, LangChain, Groq LLaMA 3.3 70B | Live Demo

- Built a full-stack GenAI career-preparation platform combining resume ATS scoring, an adaptive mock interview engine, a RAG-based knowledge assistant, and a learning roadmap generator
- Designed a document retrieval pipeline and an ATS-scoring engine that benchmarks resumes against job descriptions using LangChain, and resolved breaking API changes and CORS issues during deployment

MafiaMind – Real-Time Multiplayer Social Deduction Game

2026

React 19, TanStack Start, Supabase (Postgres, Realtime, Auth), Google Gemini | Live Demo

- Built a real-time multiplayer social deduction game where 10 AI personas powered by Google Gemini generate in-character chat and structured suspicion scores (0-100 with reasoning) each round
- Implemented Supabase Realtime for live state sync and Postgres row-level security with triggers to secure game state

Research Experience

Clinical Decision Support Through Machine Learning: Diabetes Onset Prediction

2024 – 2025

Accepted for Oral Presentation, 4th International Conference on Applied AI and Computing (ICAAIC 2025)

- Co-authored a paper benchmarking LightGBM against deep learning models for diabetes onset prediction on clinical patient data, covering preprocessing, exploratory data analysis, model training, and evaluation across accuracy, precision, recall, F1, and AUC-ROC
- Selected as one of a small number of third-year students to present at an international AI conference

Achievements & Certifications

- Selected, Amazon ML School 2026 – Top 3,000 of 134,000+ applicants
- 3rd Place, CodeVerse Hackathon (250+ teams) – built SafeWalk, an AI-powered fall-detection app
- Cleared Round 1, Polaris Fellowship 2026
- NPTEL: Introduction to Internet of Things (92%, Top 2% nationwide); Cloud Computing (85%, Top 5% nationwide)
- Certifications: IBM Python for Data Science & AI Development; IBM Generative AI Using Watsonx; Microsoft Azure Data Fundamentals (DP-900); Applied Machine Learning in Python (University of Michigan, Coursera)
